uucument ID; HF5300, Cornerstone Standard Panel Layout Drawing Rev Date: 12l6/2005 Rev Level: A

Dimensions are from inside pool panels.
 The ideal water level should be to the middle of the skimmer opening(s).

1. Rough excavation should be 2" deeper in each instance.
2. Soil to have minimum bearing capacity of 2000 P.S.F.
3. Locate top of pool at least 6" above surrounding land elevation.
4. See "Overdig Detail" for excavation around pool.
5. Fill voids under base of panels and tamp well.
6. Backfill with non-expansive material.

The dealer or contractor who sells or installs your pool is an independant contractor and is not an agent of the Manufacturer. The construction methods illustrated here are suggestions and apply
